

Sustainability and Climate Change

Adaptation Measures for your Local Council

Thursday 28th April 2022, 10.30am – 1pm
Delivered by Mike Deegan, Michael Deegan Consulting

This webinar identifies the realistic changes Parish and Town Councils can make to address the local impacts of Climate Change and growing Biodiversity Crisis.

This topic has never been more relevant, especially as local authorities are increasingly being urged to adapt and mitigate the damaging effects of Climate Change. The introduction will examine: -

- The current situation and issues in Shropshire
- National policies and the role of principal authorities and agencies
- The likely impact of forecasted extreme local weather events (flooding, storms, heatwaves)

The session will primarily focus on the opportunities for local councils, including: -

- Available advice, support and funding
- Positive case studies and examples of *Climate Change Action Plans* and *Climate Emergencies Declarations*
- Engaging and bringing your communities with you
- Energy efficiency and reducing your council's carbon footprint
- Influencing planning development and water management
- Enhancing biodiversity and land-use
- Sustainability and managing resources

Mike Deegan has over 20 years' experience working in nature conservation and a decade as a councillor with his local parish council, where he has developed award winning biodiversity and community projects.

Member delegate: £30
